

# LIGHTING

The modern lighting industry develops in the direction of LED lighting technology and cares for the growing efficacy of the produced equipment. For this purpose, it needs components of the highest quality, which, in combination with technologically advanced light sources, will allow to achieve strict standards of energy efficiency.

Mechanical components for the lighting industry provided by EURO METRICS include:

- ▶ housings
- ▶ fixtures
- ▶ heatsinks
- ▶ end caps
- ▶ mount boxes
- ▶ mount plates
- ▶ yokes
- ▶ frames
- ▶ lighting doors and door frames

## MES BUSINESS PROCESS

1  
*Sourcing  
Suppliers*

2  
*Quality  
Management*

3  
*Global  
Logistics*

4  
*Domestic  
Operations*

5  
*Inventory  
Management*

## ABOUT MES

**MES** is a full-service provider of global manufacturing & supply chain management services. We can help you with your castings, forgings, stampings, machinings needs, along with inventory management, just in time deliveries and an array of other value-added services. We source manufactured components from China, India, Vietnam, Europe and Taiwan. MES maintains warehouse facilities in Ohio, California, Mexico and Europe.

## Contact us today to learn how we can:

- ▶ Provide global manufacturing, supply chain & engineering solutions.
- ▶ Assure cost effective solutions for castings, forgings, machinings, stampings, & more.
- ▶ Help reduce inventory levels with best-in-class inventory management systems.
- ▶ Guarantee your manufactured parts are delivered on time, every time.
- ▶ Deliver 3D sample parts – Available up to 900 mm x 900 mm x 600 mm.
